

Safety of Funds

Segregation of accounts

We look after your funds. As a licensed and regulated Cyprus Investment Firm, we keep all our clients' funds apart from the company's own funds and ensure that there is a clear separation between such accounts.

CySEC Regulatory Standards

We are supervised and duly authorised by the Cyprus Securities and Exchange Commission (CySEC). We are obliged to meet our capital adequacy requirements and diligently submit our financial reporting obligations to CySEC on a frequent basis.

Technical Edge – System Integrity and Security

We are using cutting edge technology making sure that your transactions are safe and secure when you deposit, withdraw and/or invest on-line with us.

Among others, our advanced safeguards methods are:

- Strict firewalls and Secure Sockets Layer (SSL) software that are used to protect all data during transmission.
- Trading servers that are located in SAS 70 certified data centers.
- Transactions are under Level 1 PCI compliance services moderation.
- Encrypted transactions and communication data servers
